Needs more content but this is EA so that's understandable. Has the potential to be THE go to demo for really young kids and those people who i demo to that just don't get it and can't seem to fathom how to use any controller functions. Can you bend your right forefinger? Can you wave the fan in your left hand? Yes?? Well, you can play this.. Really cool game, and if you are a fan of Tilt Brush or Medium than you will enjoy Bubble Labs. Playing with the bubbles is relaxing and feels responsive.. My three-year old loves playing this. He just spent 20 minutes blowing bubbles and swatting them around with the fan. Hopefully

there is more additions planned for this game. Looks like more "fans" will be coming later. Changing sizes of bubbles would be neat too. Some sort of option or launch param to up the bubble count for those of us with more powerful machines would be nice too.. Nifty bubble physics, bonus if you're artistic. Lovely little tool! Cheap, but without feeling as much. Good entry for beginner VR players, while still being fulfilling.. Do you like VR ? Do you like to do things you'd never be able to do in real life ? Do you have 3 creds ? Well, then you probably should buy this game.. Very nice game to show to first time VR folks. Highly recommend to people who like colors lol.. This used to be a super kids friendly game, but now it wont start and are abandoned by the devs - too bad :-/. Changing my review after showing this to my parents, who are nearly 80 years old. They loved it and spent more time interacting with it than other, more complex demos I've shown them. A few minutes of 'gee that's nifty' entertainment and that's pretty much it. Good demo for youngsters or people very new to VR. A few more ways to interact with the particles or controls to adjust their behavior would be a nice addition.. This is a great bit of fun, playing around with physics in 0 G with a bubble gun! Controls are great and intuitive. You can do some cool things with the bubbles. However the bubbles don't last very long, after you make a few thousand the oldest ones expire. Overall it's neat and enjoyable, and one of very few VR titles that is 100% kid-friendly.
